

RESPONSIBLE CHOICE

MATT FINISH

PISKO® SUPERIOR RAINWATER SYSTEM

A premium matt finish rainwater system
GreenCoat RWS Pural BT, matt

Stylish. Durable. Environmentally friendly.

Pisko Superior offers a new level of both appearance and performance for rainwater systems. Matt finish blends perfectly with modern roofing materials, ageing at the same pace with the roof. Now you can choose a rainwater system that is in perfect harmony with your roof, both technically and in appearance.

Top class material

Pisko Superior is manufactured from SSAB's GreenCoat® RWS Pural BT -steel with matt finish paint coating on both sides. The steel has been specially developed for rainwater systems. Piristeel has been involved in the development of the coating from the beginning, ensuring the high quality and suitability for the manufacture of Pisko rainwater systems and the use of the products in demanding conditions. This innovative steel offers:

- **Perfect compatibility** – equal in appearance to modern roof coatings
- **Exceptional durability** – excellent corrosion resistance (RC5) and colour and gloss retention (Ruv5)
- **Excellent formability** – suitable for complex bending at temperatures down to -15 °C
- **Ecological and sustainable alternative** – a bio-based coating where traditional paint components are replaced with Nordic rapeseed oil and other renewable raw materials. Made in Finland, steel raw materials from nearby. Completely chromate-free and 100% recyclable.

Superior guarantee and colors

The Pisko Superior rainwater system is a Finnish product of the highest quality, with a 50-year technical guarantee and a 25-year coating guarantee. Rainwater system available in colors RR33/RR32 and RR23/RR2H3.

Technical properties

Gloss	< 5
Minimum inner bending radius	0.5 x sheet thickness
Scratch resistance	30 N
Lowest forming temperature	-15 °C
UV radiation resistance	RUV5
Corrosion resistance	RC5
Stain resistance	Good
Highest operating temperature	100 °C
Coating thickness, nominal (primer + topcoat)	40 µm
Coating structure	Structured and wrinkled
Steel designation	DX53D
Zinc coating	275 g/m ²
Steel thickness	0.55 mm
